EXPERIENCE

Senior Software Engineer
Sept 2022 — present

CMC Markets

Maintaining and improving the Trading platform. Migrating features to micro frontends and web components. Built a Figma CLI tool to extract designs into web components.

Senior Software Engineer
Feb 2021 — Sept 2022

Mimecast

Maintained and improved Angular apps. Implemented components, migrated legacy apps to newer Angular versions, and improved unit test coverage.

Developer → Technical Specialist
May 2015 — Feb 2021

IG Group

Progressed from developer to technical specialist over 6 years. Improved website performance by 10%, built internal tooling with Node.js and Electron, and led frontend testing and documentation initiatives. Implemented and maintained components for the main websites built on Adobe Experience Manager (AEM).

Front-end Developer
2011 — Apr 2015

Asseco PST

Built and maintained web-based banking applications consuming RESTful services. Implemented money transfer modules, account creation flows with Spring WebFlow, and the company website using IBM WCM.
